Independence Day!

*Although my hands are very small,
I made this flag to fly for all,
I might be too young to understand,
But, I know these colors stand for
something grand,
The red, white and blue forever
stand!*

Happy Independence Day!

Summer is officially here. Can you smell the sweet aroma of barbecue in the air. Yum! We would love for our families to share some of your 4th of July activities/festivities.

Last month our stars learned all about pets, farm, and zoo animals.

This month it is all about summer fun. Fun at the beach, the ocean and celebrating independence day!

Summer Safety

The summer is certainly a time to be outdoors, getting plenty of fresh air and exercise. It is also a time of sunshine, water, and bugs! While enjoying summer fun, please remember certain important safety tips* to help protect your children.

Sun Safety for Babies

- Babies under 6 months of age should be kept out of direct sun light. Move your baby to the shade under a tree, umbrella or canopy.

It's okay to apply a small amount of sunscreen on infants if there is no way to avoid the sun.

- Dress babies in lightweight clothing that covers the arms, legs and use brimmed hats.

Sun Safety for Kids

- Choose sunscreen that is made for children, preferably water-proof. Before covering your child, test the sunscreen on your child's back for an allergic reaction. Apply carefully around the eyes, avoiding eyelids. If a rash develops, talk with your pediatrician.
- Select clothes made of tightly woven fabrics. Cotton clothing is both cool and protective.
- When using a cap with a bill, make sure the bill is facing forward to shield your child's face. Sunglasses with UV protection are also a good idea for protecting your child's eyes.
- If your child gets sunburn that results in blistering, pain or fever, contact your pediatrician.

Bug Safety

There are so many insect repellents out there. What kind is best for my children?

Insect repellents come in many forms including aerosols, sprays, liquids, creams, and sticks. Some are made from chemicals and some have natural ingredients. Keep in mind that insect repellents prevent bites from biting insects but not stinging insects. Biting insects include mosquitoes, ticks, fleas, chiggers, and biting flies. Stinging insects include bees, hornets, and wasps.
